[Impact of mineral formation on restoration of the soil structure in nakhchivan AR and geographical spreading legitimacy](#)

<h2>Abstract</h2>

<p>The silt fractions have a great impact in soil structural formation. If the soil forming rocks don't disturb, crush and weather, the soil forming processes on them occur weakly, the organic substances cause formation of the loamy stratum without c...

[Alps and climate](#)

<p>Pines have been discovered to die in the Alps. In any place of skiing, you can find dried pine trees from 2x to 20 meters high. In each zone of visibility of the forest mass of such pines, there are from 1 to 90%. I wonder if

science deals with this issue?</p>
