[Embolc Septic Emboli with MRSA: A different source](#)

<h2>Abstract</h2>

<p>Septic Iliac vein thrombophlebitis with associated psoas abscess is a rare and severe entity, which diagnosis

is challenging when no risk factor is clearly present. We are presenting a case of severe septic cavitary pulmonary

emboli complicated with Acute Re...

[Brainstem Death due to hypertension induced brain hemorrhage](#)

<h2>Introduction</h2>

<p>Brain stem death is when a person has permanently lost the potential for consciousness and the capacity to

breathe. When this happens, a machine called a ventilator keeps oxygen circulating through the person's

bloodstream - a person confirmed ...

[Acute pneumonia: Facts and realities against etiological hypotheses and beliefs](#)

<h2>Abstract</h2>

<p>Modern AP concepts are focused exclusively on the infectious nature of the disease and the presence of certain pathogens. This belief determines the principles of treatment, the lack of effectiveness of which remains a concern of health professionals. The ar...
